Every one gets a chance to hunt the better sectors

In an effort to give everyone an equal chance of hunting in the most productive areas of your lodge sector, we have initiated a hunting zone rotation system. Throughout your hunting territory, hunting zones have been established. They are well marked with Safari signs. Each zone has access to trails that have also been numbered, and cleared for ATV access. Detailed maps are available at the lodge.

The day before each hunt the chief guide will assign you the zone you will be hunting in the following day. The zones are rotated throughout your week of hunting and every hunter should get a chance in the better zones. Zones are exclusive to you for that day and you should never see another hunter in your selected area. Your morning departure times can be adjusted as to the travel distance required to arrive in your area during the prime time hunting periods. Hunting is allowed 30 minutes before sunrise and stops 30 minutes after sun set. Our hunting guides are classified as auxiliary game officers and apply the Quebec fish and game laws.

We will strictly enforce existing regulations of hunting in Quebec. All our guides are assistant conservation officer duly sworn and are held at our request, to observe the law in the field of the exploitation and protection of wildlife in Quebec.
